

Technical Datasheet No : 191_(v3)
Part Number 600-074
Bridge Load Spreading Plate Set (set of 2)

Application – The bridge load spreading plates are used to spread the load from the tester feet over a larger area. Typically used on softer substrates like composite roofs and plaster board. Magnets help secure the plates to the feet and there is a hole to connect a tether. Fits all Staht Bridges in both orientations.

Specification

Weight	1.04 kg / 2.3 lbs
Material	Plastic / Steel
Finish	Natural / Plated
