Bridge Kits

Modular Bridges

Introducing the new modular bridge range, for use with the Staht t25 & t60 Digital Pull Testers. The bridges allow users to test anchors, roof anchors and posts, eyebolts, and tie-backs where a greater width or height is required. Installation designers and installers often don't consider the requirement for testing, so having the flexibly of a modular bridge kit to fit to the Staht Testers will enable you to adapt on-site to get the job done.

Bridge Kits

- **Legs** - Four indexable legs for greater strength, stability and torsional stiffness.
- **Adaptive** - Adjustable, captive feet to level the bridge.
- **Braces** - Leg braces on 575-25 & 375-60 bridges for rigidity.
- **Wide stance** - standard on all bridges with a narrow stance spacer available as an accessory.
- **Protective Bag** - Provided in a padded PVC branded Staht bag with shoulder straps and an inner roll bag for easy carrying and storage.

The modular designs allow you to change your bridge to fit your site requirement for maximum versatility
